

A PERS is not complete without a capable and resilient pendant. Nano, one of the world's smallest pendants, has a powerful transmitter, a remarkably long battery life and an incredibly long range.

Designed to wear.

The first thing you notice about Nano is its incredibly slim design. Available as a pendant or as a wristband, Nano's compact size, light weight and clean lines make it discreet and easy to wear. Unlike other bulky, dated pendants, Nano was designed to be resilient and attractive. The ability to cancel alert calls with a long press of the button and many other innovative features make Nano one of the best pendants on the market.

Wear it anywhere, anytime.

Fully sealed and waterproof, Nano can be submerged up to 6m [20 ft] underwater. While at home the user can take a shower, wash dishes, or even swim in a pool. Nano will work in nearly any situation. With an effective range of up to 200 m [650 ft] in open space, Nano can be trusted to transmit signals anywhere in the home. Paired with an astounding battery life of over 5.5 years, Nano was built for anything.
